

THE PROJECT

Our project addresses the personal development of NEET, focusing especially on building their motivation for participating in society and contributing to the labour market, increase their confidence as citizens, while enhancing their employability skills using entrepreneurship as an activator for interest and using new ICT based strategies to get in touch with educators and society.

The project's scope is two folded:

- offer a new **OUTREACH** strategy that make use of ICT and new media to increase NGOs and youth associations' ability to reach, engage and motivate NEETs
- Prepare a **COLLABORATIVE LEARNING** space where NEETs can create new opportunities for themselves and connect with peers, while enhancing their employability and entrepreneurial skills.

Co-funded by the
Erasmus+ Programme
of the European Union

PROMOTING YOUTH ENTREPRENEURSHIP TO FOSTER NEETS SOCIAL & WORK INCLUSION,
USING DIGITAL YOUTH WORK AND COLLABORATIVE TECHNIQUES

Project Activities: how far we've come

The first phase of DIGIN is dedicated to equipping the educators with more sophisticated ICT skills and tools, enabling them to define the best mix of on/off-line, individual or group activities, and allowing participants to control their own time and schedule. As there is no single method that works best to reach, engage and motivate young NEETs, different channels should be used depending on the specific target group, also using different types of media, including social media.

We are pleased to catch you up on DIGIN progress and implementation!

IO1 - Digital Handbook for Digital Natives is almost fully realized, and the final version will be available soon.

At the same time, Partners started to plan, through meetings - unfortunately still online - the realisation of **IO2 - DIG IN Programme Guide** and **IO3 - Digital Toolbox**.

We will keep you updated on the progress and hope to meet soon!
